

Process & Decision Documentation

Role-Based Process Evidence

Entry Header

Name: Amanda Mihalaros

Primary responsibility for this work: To update and make changes to a simple multi-screen game structure, including a start screen, instruction pages, separate game screens, and win/lose outcome screens. When you get the correct right answer, you go to the next screen, but if you get it wrong, you go to the lose screen. I updated this game to be music themed, changing the backgrounds to an album cover with the goal being to select the right one.

Goal of Work Session

Changes made to separate game screens, including additional buttons, updated instructions screen and text changes.

GenAI Documentation

If GenAI was used (keep each response as brief as possible):

GenAI was NOT used for the changes made to the code.
